CLAIMS

Jub Ai

A system for distributing music and data comprising:

first means for transmitting said data using a first network, said first network being a wireless network;

second means for receiving said transmitting data;

5 third means for receiving user input; and

fourth means for storing a signal identifying said data in response to said user input.

- 2. The invention of Claim 1 further including fifth means, responsive to said stored signal, for retrieving said data from a second network.
- 3. The invention of Claim 1 wherein said fourth means includes a removable electronic storage medium.
- 4. The invention of Claim 3 wherein said removable electronic storage medium is a flash memory card.
- 5. The invention of Claim 2 wherein said second network is the Internet or World Wide Web.

Sub A2/

6. The invention of Claim 1 wherein said data includes a plurality of music selections.

5

7. The invention of Claim 6 wherein said second means includes means for playing said music selections as they are received from said first means.

8. The invention of Claim 1 wherein said first means is a satellite radio transmitter and said second means is a satellite radio receiver.

9. The invention of Claim 1 wherein said third means includes a voice recognition system.

10. The invention of Claim 8 wherein said fifth means includes a kiosk.

11. The invention of Claim 1 further including means for selectively disabling said fourth means in response to a nonrecord-ability signal.

12. The invention of Claim 1 further including means for selectively displaying information relating to said signal identifying said data.

13. A system for recording data comprising:

a sate lite radio transmitter for transmitting said data;

a receiver for receiving said transmitting data;

means for receiving user input;

a removable electronic storage medium for storing a signal identifying said data in response to said user input; and

a computer, responsive to said stored signal, for retrieving said data from the Internet or World Wide Web.

15. The invention of Claim 13 wherein said means for receiving user input includes a voice recognition system.

Sub AY 16. A system for distributing music and data comprising:

first means for transmitting said data using a first network, said first network being a vireless network;

second means for receiving said transmitting data;

third means for receiving user input;

fourth means for storing a signal identifying said data in response to said user input; and

fifth means for selectively disabling said fourth means in response to a nonrecordability signal.

10

A method for recording data including the steps of:

transmitting said data using a first network, said first network being a wireless network;

receiving said transmitting data;

5 receiving user input;

storing a signal identifying said data in response to said user input; and retrieving said data from a second network in response to said stored signal.
